

Narron Construction

A Client Success Story

Narron Construction: Road to Success Paved with Business Technology Solutions and MAS90

Business Challenge:

Ability to monitor profitability on a project by-project basis and expense category.

Automate job cost tracking, for better analysis of time and material charges per project.

Results Achieved:

- Monitor profitability on a project and expense category basis
- Accurately estimate jobs
- Performance to bid ratio
- Up-to-the minute labor costs
- Elimination of double-entry

Debbie Narron runs a woman-owned business in a predominantly male industry: road building. Her company, Narron Construction, has been paving roads, sidewalks and parking lots in North Carolina since 1990, and keeps six crews busy throughout the Greater Raleigh-Durham area. Van Narron, her husband, and Michael Vaught supervise activities in the field and are the main estimators, while Debbie manages the business from headquarters.

Narron Construction has built its reputation on honesty and going the extra mile to do a job right. Showcase projects include all streetwork at Parker Lincoln Building, one of Raleigh's most prestigious developments, and sidewalks in historic Wilson, NC, home to the East Coast's largest antique market. During its start-up years, Narron Construction was well-served by Peachtree by Sage as its accounting package. But with growth came the need for more complex cost-assessment capabilities. On the advice of its trusted CPA firm and the help of Business Technology Solutions, Narron upgraded to Sage MAS 90 and implemented the Job Cost module.

Tracking Performance to Bid

The MAS 90 Job Cost module was developed for contractors, engineers, architects and subcontractors who need to monitor profitability on a project by-project basis. Job Cost integrates seamlessly with all other MAS 90 modules. Cost information is entered once, and automatically flows to and from accounts payable, accounts receivable, payroll and general ledger modules. This has helped Narron Construction to streamline data entry tasks and ensure greater accuracy throughout the company.

"With the Job Cost module, we charge the right amount to each job, and know where we stand with performance-to bid at all times," says Tammy Wall, office manager at Narron Construction. "We do projects on fixed bids, so it's essential that we have up-to-date information on individual project costs. With reliable data at our fingertips, we can work smarter and make speedy changes while work is still in progress to maintain profitability."

Fleible Reporting Features

Wall likes being able to view Job Cost data in a variety of ways. "We can break out items by labor, materials, subcontractor, vendor, or even maintenance costs on individual pieces of equipment," she explains. "This gives us a snapshot of everything, either by project or by expense category. This helps us constantly improve. We know what we ought to do differently next time, and can estimate future jobs more accurately."

Narron's supervisors turn in daily time sheets. Each employee's hours are then input to the MAS 90 TimeCard module, which automatically delivers data every day to Job Cost. Wage information is delivered to the Payroll module once a week. This allows jobs to reflect up-to-the minute labor costs while ensuring that the Payroll module has the information it needs just in time for payday.

Tickets for non-labor expenses are first put into a spreadsheet. When a bill is received, expenses are transferred to Job Cost for project posting. After a brief learning curve, MAS 90 has proven to be easy to use. "Not only is data simple to enter, but it's also simple to locate again and update when necessary," Wall says. "I can look up items anywhere in the system in seconds. If a vendor claims that we are overdue on a bill, for example, I can just click on MAS 90 and determine whether we received an invoice and when it was paid. This saves me so much time, and makes my workload a lot easier." Wall says that MAS 90 and Job Cost provided everything Narron Construction needed — and more. "I'd hate being forced to use anything else," she notes. "It's hard to imagine any other application working better than our current system does now."

About Business Technology Solutions

Business Technology Solutions, Inc. provides complete Accounting and Human Resources solutions that enable organizations to automate and streamline their business. By partnering with Sage Software, Business Technology Solutions offers feature-rich solutions built with the latest technology. From e-business to payroll or from Inventory Management to Recruiting, Business Technology Solutions has the technical expertise necessary to make businesses more efficient and improve profitability.

"With the MAS 90 Job Cost module, we charge the right amount to each job, and know where we stand with performance to-bid at all times."
